1. The applicant is hereby notified that this International Preliminary Examining Authority transmits herewith the international preliminary examination report and its annexes, if any, established on the international application.
2. A copy of the report and its annexes, if any, is being transmitted to the International Bureau for communication to all the elected Offices.
3. Where required by any of the elected Offices, the International Bureau will prepare an English translation of the report (but not of any annexes) and will transmit such translation to those Offices.
4. **REMINDER**

The applicant must enter the national phase before each elected Office by performing certain acts (filing translations and paying national fees) within 30 months from the priority date (or later in some Offices)(Article 39(1))(see also the reminder sent by the International Bureau with Form PCT/IB/301).

Where a translation of the international application must be furnished to an elected Office, that translation must contain a translation of any annexes to the international preliminary examination report. It is the applicant's responsibility to prepare and furnish such translation directly to each elected Office concerned.

For further details on the applicable time limits and requirements of the elected Offices, see Volume II of the PCT Applicant's Guide.

1. Claims 1-17 lack an inventive step under PCT Article 33(3) as being obvious over Sheridan.

Sheridan discloses a method of distributing images over the Internet comprising:

a) harvesting images of different formats from a plurality of sites based on user-supplied information (see col 4, lines 42-47, col 9, lines 54-57, col 11, lines 23-36),

b) creating thumbnail images corresponding to the harvested images (see col 5, lines 35-41),

c) combining thumbnail images onto a page for presentation at a remote site (see col 5, lines 19-35).

Sheridan does not teach compiling the thumbnail images onto a web page. The use of web pages for allowing access of information over the Internet is well-known in the art. It would have been obvious to one of ordinary skill in the art at the time the invention was made to compiling and indexing one or more set of thumbnail images onto a web page for presentation at a remote site because it would have enabled a remote user to access the selected images using a conventional web browser.
